Finding a clean zone that is 100 % saturated with water is a difficult task. This places us in a difficult position because we must know the value of the formation factor. Sun, 04 Nov 2018 08:18:00 GMT Chapter 2 Electrical Logging - springer.com - A log recorded using an electrical wireline. In this sense, the term refers to any log recorded on a wireline, whether it measures an electrical quantity or not. The term dates from the early days of logging when the only logs were the spontaneous potential and resistivity from conventional electrode devices.
