extinguishing systems the  
simple solution Minimax -  
Fire prevention systems  
reduce the air oxygen  
content in the protection  
area through a controlled  
supply of nitrogen to create  
a "fire-safe" atmosphere.  
This prevents fires right at  
the outset. Depending on  
the deployed fire prevention  
system, the development of  
the "fire-proof" atmosphere  
is either permanent or  
on-demand. Wed, 07 Nov
